

Digital Offer Targeting & Merchant Engagement Analytics

Data-driven analysis of customer offer incrementality and merchant engagement to identify high-value targeting opportunities and actionable merchant priorities.

Relative Conversion Lift	Top-10% Lift vs Random	Merchants Analyzed	Declining Merchant Share
59.45%	3.98x	8,812	26.79%

Business Overview

This dashboard evaluates two sides of customer and merchant engagement: offer incrementality and merchant health. Criteo analysis identifies customers who are most responsive to digital offers, while Yelp analysis identifies merchant engagement trends and customer-experience drivers.

Key Business Questions

- Which customers should be prioritized for digital offers?
- Which merchants require intervention or growth campaigns?
- What customer-experience themes are associated with merchant performance?

Key Takeaway:

Criteo: Target top 10% of customers — captures ~65% of conversions with 3.98× the lift of random targeting.

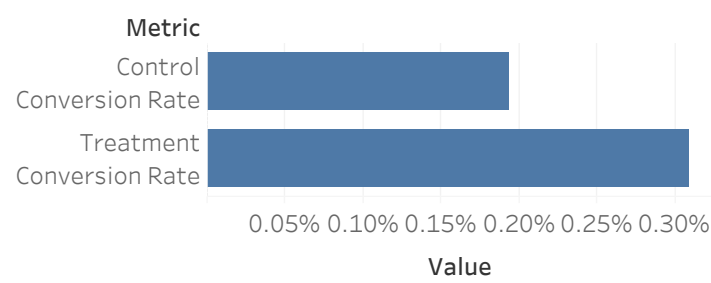

Yelp: 53 merchants show strong engagement but negative sentiment — prioritize CX intervention. 79 merchants show weak engagement but positive sentiment — prioritize growth campaigns.

Criteo — Targeting →	Yelp — Merchant Engagement →
----------------------	------------------------------

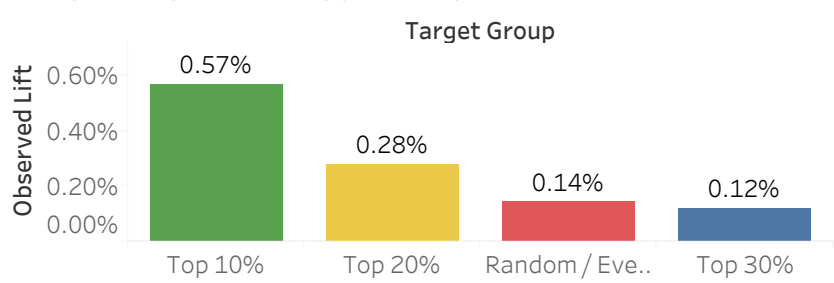

Criteo — Targeting

- Business Action
- Consider if additional reach is required
 - Limited targeting; incremental benefit is weaker
 - No uplift-based prioritization
 - Prioritize

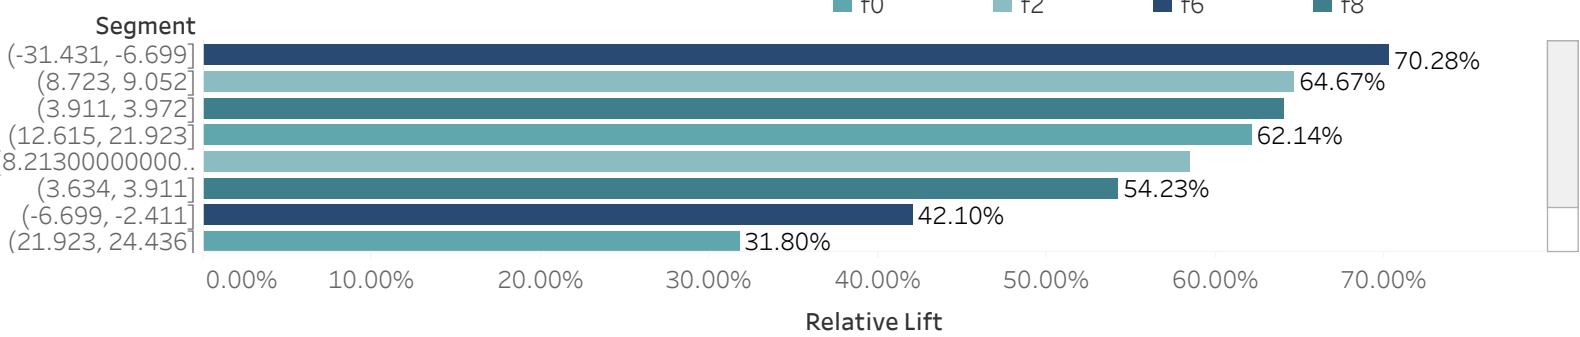

Conv Rate - Control vs Treatment

Targeting Strategy Comparison

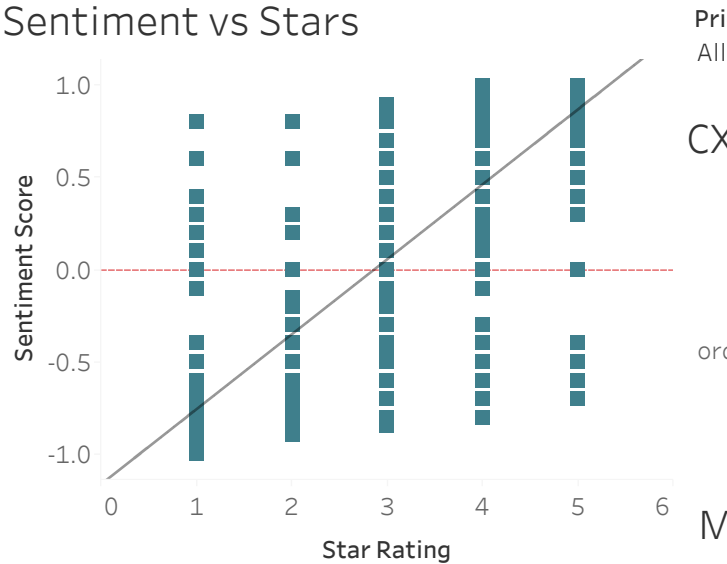

Relative Lift by Segment

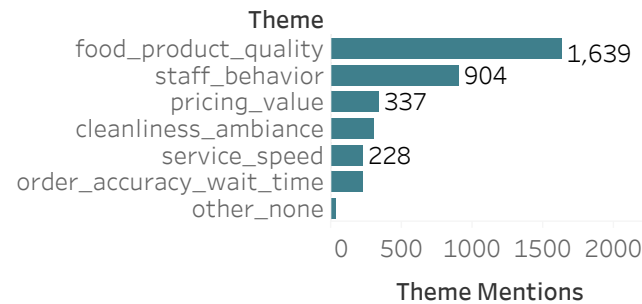

Recommendation:
Target the top 10% of customers — captures ~65% of conversions with **3.98× the lift of random targeting**.
